

BlueStep goes beyond traditional EHR systems and provides the most comprehensive and flexible solutions available for senior-living providers. BlueStep features include resident records, medication administration, care charting, marketing, human resources, facility management, invoicing, family communications and much more. The fully-flexible BlueStep platform offers corporate reporting automation and dashboards as well as complete application development. BlueStep users easily customize solutions to meet specific operational and clinical needs. It's time to think differently about senior-living software, and we have exactly what you need. We call it, "brilliant solutions powered by you."

ManageMAR

BlueStep's revolutionary ManageMAR™ offers true integration by connecting communities and pharmacies across the nation. Clinically-rich documentation and alerts are delivered on a modern and simple-to-use application that is web-based and mobile-friendly.

ManageCARE

ManageCARE™ takes your community to the next level. Integrate medication administration with care and compliance systems for assessments, service plans, ADLs, behaviors, vital signs, incident reports and more. ManageCARE™ offers a single-login solution for all medication, care and compliance documentation.

ManagePRO

ManagePRO™ greatly expands senior-living community information management beyond a traditional EHR. This complete package combines all the components of ManageMAR™ and ManageCARE™, and also includes marketing, HR/staffing, facility maintenance, house-keeping, invoicing, and family communications.

BlueStep PLATFORM

BlueStep PLATFORM™ stands alone as the only rapid application development solution with a complete senior-living solution included. PLATFORM is a comprehensive development and customization toolkit. Senior-living providers no longer need to compromise with hard-coded, 'one size fits all' software that requires inconvenient workarounds. PLATFORM eliminates the need to develop costly software 'from the ground up' and gives providers the unlimited control to completely customize any of the pre-configured reports and modules. Providers also have the power to quickly design, develop, and deploy components such as applications, reports, alerts and more. PLATFORM is a critical tool in the success of your company.
